

SSR DEGREE COLLEGE, NIZAMABAD (5029)
DEPARTMENT OF NUTRITION
SEMESTER – VI , INTERNAL-II QUESTION BANK

1. Aspergillus produces citric acid
2. Diseases that spread from one person to another are called Communicable diseases
3. Diabetes diseases is an example of non-communicable diseases
4. Alzheimer's and osteoporosis are examples of Degenerative diseases
- 5 Infectious diseases diseases is caused by various pathogenic microorganisms
6. The deficiency diseases can be prevented by Eating food with good nutritional value
7. Amoxicillin, Doxycycline Azithromycin, and Penicillin are some examples of Antibiotics
8. The World Health Day is celebrated on 7th April
9. Carbohydrates components are major nutrients in our food
10. Proteins and Vitamins food components is required for the growth and maintenance of the human body
11. plague ,leprosy ,diphtheria is a set of bacterial diseases
12. Vibrio cholerae is a motile bacteria, which belong to the group of Monotrichous
13. In Ayurveda, the Cholera disease is called as Vishuchika
14. Syphilis, a sexually transmitted disease is caused by Treponema pallidum
15. Suffocation is the symptom of Diphtheria
16. Widal test is used for the susceptibility of Thphoid
17. Bacteria pathogens causes Tuberculosis.
18. Bacteria pathogens causes cholera in humans .
19. Mycobacterium pathogens causes Leprosy in humans
20. Excessive bleeding during an injury is a deficiency of Vitamin- K
21. Aspergillus produces citric acid
22. Anabaena organism is nitrogen fixing and found in rice field in symbiotic association with azolla
23. Rizobium is used as a biofertilization for soyabean crop
24. A common biopesticide for preventing plants from butterfly caterpillar is bactillus thuringensis
25. Yeast is used for the production of ethanol
26. Chlorella alga can be used as food for the human being
27. Saccharomyces organisms is used in alcoholic fermentation
28. Jersey is a breed of cattle
29. Gobar gas plants use methanogenic bacteria
30. Green revolution was led by Norman Borlaug
31. The process of protoplast isolation was first carried out by Kierck
32. Cast nets are designed to catch salmon
33. Is the result of an artificial hybridization between radish and cabbage raphanobrassica
34. Bioenergy is obtained from biomass
35. Hypophysetion is a technique primarily used in fisheries
36. Diethylstilbestrol was given to cows for increasing the milk yield before being banned in 1979
37. Feedstock for biodiesel can primarily be obtained from Jatropha
38. Crossing between different breeds is called out crossing
39. Leghorn is an example of an American breed of poultry
40. Autoclave is an instrument that helps to achieve specific temperature and pressure for scientific and industrial applications

1. **Define cholera**

Ans: Cholera is an acute diarrheal infection caused by consuming food or water contaminated with the bacterium *Vibrio cholerae*

2. **Intoxication**

Ans: the condition of having physical or mental control markedly diminished by the effects of alcohol or drugs

3. **Food born illness**

Ans: Foodborne illness is caused by consuming contaminated foods or beverages. Many different disease-causing microbes or pathogens can contaminate

4. **Audio visual Aids**

Ans: Audio visual education or multimedia based education is an instruction where particular attention is paid to the audio visual or multimedia presentation of the material

5. **Define health education**

Ans: Health education is any combination of learning experiences designed to help individuals and communities improve their health by increasing their knowledge or influencing their attitudes

6. Immunizing agent

Ans: Any substance or organism that provokes an immune response when introduced into the body

7. Food standard

Ans: Food safety is used as a scientific method discipline describing handling preparation and storage of food in ways that prevent food borne illness

8. Define HACCP

Ans: HACCP is a management system in which food safety is addressed through the analysis and control of biological chemical and physical hazard from raw material production

9. National immunization schedule

Ans: All pregnant women infant and children at specified time must be vaccinated against communicable disease so as to give protection against such diseases chicken pox diphtheria, T.B etc. All the countries have their own immunization schedule according to their local needs and feasibility

10. Define UNICEF

Ans: UNICEF the United Nations Children's Fund was founded in 1946 to meet the emergency needs of children in war torn Europe China and Middle East
